OFFICER BIOGRAPHY

Chris S. Barton, President, is the founder and sole shareholder of Wholesale Carrier Services, Inc. Mr. Barton, 36, is a 15 year veteran in the telecommunications marketplace. Upon leaving the University of Texas at Austin in 1987 as Computer Engineering major, Chris began a 10 year sales and management career with MCI Telecommunications. Following a successful series of advancements in corporate sales positions, Chris' tenure at MCI finished with as a Branch Manager in Miami managing one of Worldcom's largest markets.

Mr. Barton established Wholesale Carrier Services, Inc. primarily to serve the needs of underdeveloped telecommunications departments in hotel chains and large corporations. As a result of the breakup of the phone company monopolies and the constantly advancing technologies in the communications marketplace, WCS found itself uniquely positioned to cater to customers seeking assistance in the selection of technology vendors and network design. WCS exclusively pursues large-enterprise, commercial network clients with billings in excess of \$500,000 annually in total telecommunications expenditures. By focusing on the upper end of the telecommunications market, WCS has been able to secure long term consulting and network contracts with its customers, bringing stability and strong corresponding growth. Due to our focus on a select group of large network clients, WCS is also able to provide exemplary customer service combined with thorough industry knowledge on a wide variety of services. The depth of our clients' purchasing needs allows WCS to create and market unique products on facilities strategically owned and operated by WCS. This minimizes the brokering or "middleman effect" and allows WCS to control the quality, billing integrity and provisioning of the various services we offer.

Mr. Barton is also the founder and managing partner of G3 Networks LLC. Based in Miami, FL. G3 offers a variety of enhanced communications services products as a state-of-the-art service bureau. G3 Networks, LLC maintains an intelligent DS3-level call processing platform which currently manages a capacity of over 4 million calls per month, an internet telephony switch and voice response platform supporting up to 1,500 ports of service. Some of the services provided are database-driven toll-free call routing applications supporting clients with hundreds, even thousands of locations,

Internet web page "Call Me" buttons, PC-to-phone dialing, prepaid local and long distance calling. G3 Networks also builds and maintains highly specialized telephone direct response applications for a variety television, print and radio advertisers.

Mr. Barton is an early equity partner in iBill.Com, a highly profitable, \$500 million emerging "dot.com" company. Established in Fort Lauderdale in 1996, iBill fulfills today's growing need for fast, reliable and secure electronic commerce solutions. iBill is one of the fastest growing world-class providers of electronic commerce services to small-to-midsize Web sites selling access, content, services, and tangible products. A May 2001 article in *Forbes Magazine* listed iBill as the 5th most visited B2B Internet site in the world with over 1.4 million unique visitors each month, serving more than 50,000 small, mid-sized and high-volume merchants.

Mr. Barton also is an equity partner and advisor to Eureka! Broadband, est. 1998, to help landlords transform carefully selected commercial properties into specialized, high technology buildings. Eureka! Broadband implements this strategy by forming alliances and joint ventures with landlords to deploy and sell services over advanced broadband networks within their buildings. Eureka! Broadband operates in over 80 million sq feet of commercial office space with nearly 100 employees in 6 US markets. Recently, Eureka merged with Gillette Global Network (<http://www.ggn.com>) . Eureka has secured nearly \$100 million in venture financing rounds from Spectrum Equity Investors, CB Richard Ellis Investors, and AT&T Ventures
